

## Update and Reminder - Informal Regulations Workshop on Glass Container Processing and Other Similar Materials

UPDATE: The Department of Resources Recycling and Recovery (CalRecycle) has rescheduled the workshop on glass container processing and other similar materials from December 20, 2016 afternoon to the morning of December 21, 2016.

New Workshop information:

Date: December 21, 2016  
Time: 9:00 A.M. to 11:30 A.M.  
Location: Cal/EPA Building  
Byron Sher Auditorium, 2<sup>nd</sup> Floor  
1001 I Street  
Sacramento, CA 95814

REMINDER: CalRecycle staff continues to seek input prior to the workshop on the following items:

- 1) What is the appropriate regulatory tier placement for glass container processing operations, which are currently under the Enforcement Agency notification regulatory tier (e.g., enforcement agency notification, registration, full)?
- 2) Are the current transfer/processing state minimum standards appropriate for these types of handling activities? What design and/or operating requirements should be changed to address any unique aspects of these types of activities? See Title 14 sections [17406.1-17419.2](#)
- 3) Are there other similar material handling activities that should also be included in the transfer/processing regulatory framework, for example sites that handle separated plastic, paper, metals, etc.?

Please submit your responses to these questions to [transfer.processing.regs@calrecycle.ca.gov](mailto:transfer.processing.regs@calrecycle.ca.gov) prior to December 21, 2016.

If you would like to receive email notifications regarding this or future glass container processing rulemaking developments, please subscribe to the [Glass Container Processing and Other Similar Materials Rulemaking Listserv](#). To follow the rulemaking process, please visit the [Glass Container Processing and Other Similar Materials webpage](#).
